

S.B.M Healthcare (India) Pvt.Ltd

**International Service Provider
From Concept to Completion**

Total Solution For All Your Medical Imaging Equipment Needs

S.B.M Healthcare (India) Pvt.Ltd

About us

We shall like to introduce ourselves as a reputed supplier of *Pre-Owned Siemens CT Scanners* and 1.5 MRI systems of Siemens.

After sales service for which we are undertaking comprehensive as well as non comprehensive annual maintenance contract and are giving satisfactory and reliable services throughout India.

We have a dedicated and fully trained team of service engineers who are stationed at 6 different offices across India and can attend to any breakdown job within 24 hours. SBM India's Head Quartered at New Delhi and branches at Hyderabad, Patna & Kolkata. Also, has more than 250 installations which are being regularly attended by our service engineers for preventive maintenance and breakdown jobs.

Our main objective is to provide customers our valued services at nearly the half the cost of the OEM's price. Our warehouse located in different parts of India manages to provide uninterrupted supply of spare parts of CT Scanners & MRI Machines across India. We guarantee and assured supply of spare parts inclusive of CT Tube for next 10 years. The key advantages for our customers are.

- Unmatched quality of refurbished CT Scanner & MRI at an *affordable* price.
- Provide Service Contract which covers spare parts, labor and x-ray tubes.
- Immediate response to service calls across India.
- Comprehensive ready stock of quality imported machines and Spare Parts from the complete line of Siemens models.
- Assessment of parts for attending breakdown jobs through pro-trouble shooting technique.
- Provide maximum customer support and minimum site downtime.

Somatom Emotion

Outstanding overall system uptime due to robust design and stability. The tube of the SOMATOM Emotion regularly achieves 10,000 scans – and more – without a single failure. High power reserves with up to 40 kW generator power and 3.5 MHU tube are especially useful with corpulent patients. The Ultra Fast Ceramic (UFC™) Detector system is the central part of all Siemens' CT scanners. Speed, image quality, and low dose are what Siemens UFC detectors make possible. Siemens' ceramic UFC scintillators excel in fast decay behavior and an extremely short afterglow time.

Software's - CAP3D, MIP, VRT, CARE DOSE & CAP3D EDITOR

A combination of well-proven components and modern features are setting standards in the segment of entry-level CT. One of the best patient throughput-to-investment ratios on the market. Virtually no loss of time or patient throughput – installation time is only one day. Low heat dissipation and power consumption.

X-ray Tube - 2MHU

Gantry Aperture - 70cm

ICS/IES SOFTWARE VB27B

Software's - CAP3D, MIP, VRT, CARE DOSE & CAP3D EDITOR

Air Cooled Machine

Somatom Spirit Duo

Somatom Emotion 6

Siemens SOMATOM Emotion 6 Features, Syngo user interface enhances lung and cardiac care. Easy to use and operate. Ideal for image-guided interventions. Equipped with an air-cooled, high-speed patient gantry. Fast 3D-processing tools. Includes the SureView™ multislice image reconstruction system.

X-ray Tube - 5MHU

Gantry Aperture - 70cm

ICS/IES SOFTWARE VB20B

Software's - CAP3D, MIP, VRT, CARE DOSE, RTD, SSD & ANGIO

Air Cooled Machine

One of the most popular CT systems in the world, the Siemens Somatom Emotion 16 CT scanner has been designed with a 70 cm aperture and a 50 cm scan field. It has a patient table that can hold patients up to 440 pounds. The Somatom Emotion 16 CT offers reconstruction on the fly with up to 16 images per second. This system allows your clinic to reduce your patient scanning backlog and perform routine exams as well as detailed and high resolution investigations.

Software's - CAP3D, MIP, VRT, CARE DOSE, RTD, SSD & ANGIO

Somatom Emotion 16

Somatom Sensation 16

The refurbished Siemens SOMATOM Sensation 16 slice computed tomography scanner is capable of acquiring up to 32 slices per second while maintaining the highest possible image quality. Sensation 16-Slice CT was designed to provide maximum possible clinical information in the most efficient way.

X-ray Tube - 5MHU
 Gantry Aperture - 70cm
 ICS/IES SOFTWARE VB20B
 Software's - CAP3D, MIP, VRT, CARE DOSE, RTD, SSD & ANGIO

It covers routine oncological examinations as well as trauma diagnostics, interventional radiology, and vascular imaging. For greater clinical requirements and larger patient numbers, Somatom Scope Power is recommended: With a stronger X-ray tube, a higher performance generator, and faster rotation speed, it enables greater volume coverage.

X-ray Tube - 2MHU
 Gantry Aperture - 70cm
 ICS/IES SOFTWARE VB42B
 Software's - CAP3D, MIP, VRT, CARE DOSE, RTD, SSD & ANGIO

Air Cooled Machine

Somatom Scope 16

Somatom Sensation 64

The Siemens SOMATOM Sensation 64 Slice CT is the flagship of the award-winning Sensation series. The Siemens Sensation 64 was the first CT scanner with the ability to take 192 images of the heart per second. Like the Sensation 40 Slice, the Siemens Sensation 64 slice offers a very high routine isotropic resolution of 0.33mm, allowing it to visualize the smallest pathology with outstanding quality.

X-ray Tube - 6.5MHU
 Software's - CAP3D, MIP, VRT, CARE DOSE, RTD, SSD & ANGIO

The Siemens MAGNETOM Symphony 1.5T is a full-body, 60-cm bore MRI system that provides powerful imaging across all kinds of patients and procedures. Outfitted with Syngo Expert-i technology, the clinicians can access the Siemens MAGNETOM Symphony 1.5T imaging feed from anywhere on the network while a patient is being scanned.

Magnetom Symphony

60-cm system available in an 18- or 32-channel configuration Expands upon the Symphony applications, adding additional inline processing such as Inline Diffusion for automated ADC mapping Nine Tim application suites standard, including cardiac, pediatric1, and breast Lightweight (patient friendly), scalable coils part of the standard configuration Advanced applications standard, such as REVEAL for whole-body diffusion. For example, REVEAL can be used to detect lesions on the liver and lymph nodes Low siting costs and high technology benefit smaller hospitals and imaging centers

Magnetom Symphony Tim

Magnetom Avanto

MAGNETOM® Avanto, A Tim+Dot System is the landmark in 1.5T imaging due to Tim technology® in combination with a dramatic reduction in acoustic noise, and a comprehensive application range up to 205 cm whole-body imaging. With the integration of Dot®, the power of Tim is multiplied resulting in greater image consistency and diagnostic confidence, greater ease-of-use, and a day that's more productive than ever before.

Ungraded Softwares

Airis II

The innovative gantry design and wide patient table continues to deliver a high level of patient comfort. The AIRIS II has continued to maintain high resale value over the last decade and remains a sought-after scanner on the used equipment market. 0.3T permanent magnet technology means economical siting and operation, Small 5G footprint – 6.6ft. horizontal x 8.2ft. vertical. No Equipment room or chiller required, 388 sq. ft. minimum site plan, 208v single phase power, Low 3KW average power consumption, Open patient accessibility, 80cm wide patient table, 18" minimum table height, 500 lb weight capacity

Hitachi AIRIS Mate is a compact high-performance MRI system with a permanent magnet of 0.2 Tesla. AIRIS Mate is the top-performing whole-body MRI system, incorporating a permanent magnet which can accommodate all types of sequences, both routine and special. This is the lightest in the industry. This performance, coupled with Hitachi's unique gantry design and large vertical opening, provides improved patient comfort and expanded clinical utility to open

Airis Mate

Axiom Artis DFC

AXIOM Artis DFC, uniquely capable of improving the ease and accuracy of catheter-based procedures to facilitate increased efficiency and productivity in interventional medicine. The new technology features a biplane configuration, which enables medical facilities to use the system as either a biplane angiography C-arm system.

WHY Refurbished MRI?

Refurbishment team considers the machine's age, performance and service history. Initial evaluation report including mechanical performance & component checkup. Thorough internal & external cleaning plus dust removal & fully decontamination of the machine. Restoration of old & worn out mechanical parts like cold head , absorber , coils , covers , table pads , etc. Restoration of body parts including denting & painting job. Damaged decals & keypad overlays are replaced. Any component that fail functional testing are repaired or replaced. Software updates are provided if the machine was initially not updated and machines is reset to new customer specifications Machine is calibrated and one year comprehensive warranty just like the OEM is provided and CMC after that. Therefore while buying a true refurbished MRI machine you get to lay your hands on a machine that can function effectively like a new machine without any compromise. However discretion is always advised while choosing your refurbishment vendor.
